## ELIGIBILITY CRITERIA

A horse is eligible for the QBRED Incentive Scheme should it meet the eligibility criteria listed below and all other terms and conditions of the QBRED Incentive Scheme ('QBRED Horse').

### ELIGIBILITY A - Queensland Based Mare

The progeny of a mare inseminated in Queensland with the semen of a registered Standardbred stallion (whether or not that stallion was registered as standing in Queensland at the time of insemination) and which is born and notified in Queensland;

### ELIGIBILITY B - Queensland Sired

The progeny of a mare inseminated with the semen of a Standardbred stallion where that stallion was, at the time of insemination, registered with the Queensland Racing and Integrity Commission (QRIC) and located in Queensland;

### ELIGIBILITY C - Transitional QBRED

The progeny of a mare inseminated outside of Queensland that produces a foal which is born in Queensland. No other progeny of the mare is allowed to have participated in QBRED (or be a current QBRED horse) and at least 50% of the progeny must be owned by residents of Queensland (on the day of foaling);

### ELIGIBILITY D - Additional Trotter

The progeny of a mare inseminated with the semen of a Standardbred stallion where the stallion was, at the time of insemination, registered with the QRIC and listed in the Standardbred Stallion Index as a Trotter ('TR' notation). The foal must be born in Australia. **With trotting stallions now physically standing in Qld this eligibility type is being phased out. Progeny of mares inseminated during the 2022/23 Breeding Season will be eligible for QBRED under this eligibility type, but not from 2023/24 onwards.**

*\* For Eligibility B horses and Eligibility D horses that were foaled outside of Queensland, and all Eligibility C horses a QBRED Request Form must be submitted to and accepted by Racing Queensland prior to the horse becoming eligible for QBRED.*
