Browne stated that the horse travelled well in the early and middle stages but did not respond to his riding as he expected soon after straightening. He recommended to connections that a tongue-tie be applied for future starts as he was of the view that the horse may have got its tongue back during the event. A post race veterinary examination revealed the horse to have a slow post-race recovery. A swab sample was taken. |                   |            |  |

Orman reported the gelding may have got its tongue over the bit. Stewards nevertheless advised trainer M. Dunn that the gelding must trial to the satisfaction of stewards prior to racing again.

S. Comments:Questioned re performance, rider stated that with blinkers added to the gear he intended on settling in a forward position however his was unable to muster early speed and settled further back. Added that his mount started to work into a sprint rounding the home turn however he was obliged to strop riding it along when it was tightened for room at the entrance to the straight. Added that failed to sprint from this point and was disappointing in its run to the line. A vet exam did not reveal any abnormality.
