S. Comments:Rider T Clark explained that the colt, which was racing without blinkers, travelled well in the early and middle stages, however, was under pressure from as far out as the 800m and weakened in the straight. He indicated that, in his opinion, the colt may have come to the end of its preparation. A post-race veterinary examination revealed the colt to be displaying a poor post-race recovery and showing signs of heat stress.

After passing the 800m the mare was not responding to her riding and failed to travel comfortably at any stage of the event and proved disappointing. App Denby was of the opinion that the mare was not comfortable on today's track conditions. A post race veterinary examination revealed the mare to be displaying a cough and a nasal discharge. Trainer reported horse pulled up well and agreed may not have been comfortable in conditions. Believed it would be better suited over further ground when able to settle closer to the lead.
